**DISCLAIMER**

The well location computations are based on three types of location information provided by well owners or well contractors. In order of preference, they are: 1) geographic latitude and longitude coordinates (GPS or other source), 2) footage from section lines, 3) legal descriptions. The last two location types are based on calculated section corners, and not surveyed information or GPS coordinates. Therefore, **ALWAYS** check with the water well owner for the land description (including Footage, Quarter/Quarter, Section, Township, Range and County) of the property where the well is located. This computed well location information is the best available information that was provided to the Department, but is not be suitable for making any regulatory, business or legal decision without further verification of a water well's true location.

## REGISTERED GROUNDWATER WELLS DATA RETRIEVAL

### Search Results Maximum 100 Per Page

Note:

Public Water Supply information is not available through this tool. If you have a need for such information, please submit a request through the following link:

Submit a DWEE Assistance Request Form (<https://app.smartsheet.com/b/form/cfd8e319e8554b7191c6602a62611c19>).

The well owner will be contacted for the purpose of authorizing access to information about their well(s). All registration documentation for water wells registered after January 1, 1969, except Public Water Supply wells, are now available.

Due to possibility of a well being in more than one series, an individual well might be listed more than once.
